

# DIE SUID AFRIKAANSE MINIATUURPERD TELERS GENOOTSKAP

## NUUSBRIEF 3/4 2015

"ALWAYS BELIEVE THAT SOMETHING WONDERFUL IS ABOUT TO HAPPEN"

Dit is weer daardie tyd van die jaar.... Kersfees!! Lekker sonnige, warm dae. Luilekker seevakansies en tyd vir ontspan. Tyd om te onthou dat Christus gebore is vir ons, tyd om terug te dink aan die ster van Bethlehem, drie wyse manne met wierook, goud en speserye as geskenk vir 'n **Baie Spesiale Baba** wat gebore is. Tyd om terug te reflekteer op 'n jaar wat verby snel met ons wat die pylvak inskiet. Lekker tyd van die jaar!! Refleksie tyd van die jaar. Tyd om te vergewe. Tyd om te gee. Tyd om te onthou wat die geboorte van die Christus Kind eintlik beteken!

The SA Miniature Horse Breed Society shows have grown in leaps and bounds, having exceeded everybody's expectations. We have grown from not having a Nationals Championship in 2009 to having eight shows in 2015. For the first time in the last six years we have managed to have **more** than 100 horses entered at the Jacaranda Show. We now regularly have more than 60 horses from as many as 15 breeders in 200 plus classes entered in shows.

Ons was n paar keer op TV, ons het veiling gehou en ons het gegroei in lede getalle asook in rasgetalle. Ons het 'n voorspoedige jaar beleef, God is goed vir ons.

The miniature horse has grown into a breed to be recognized, we are currently holding our own amongst the other horse breeds in SA, we are finally considered a force to be reckoned with. We have miniatures being placed in the General Breed classes and we are competing with great honour in the Interbreed Championships. We get compliments about our horse's turnout and presentation and judges recognize the progress we are making.

Some of our Breed Society's proudest moments come when one of ours, wins in open competitions, besting rival breeds.

Ons *utility* of dan nutsklasse groei vining en die mark vergroot daaglik vir ons reunperde. Vir die eerste keer het ons meer inskrywings in die nutsklasse gehad by die Jakaranda skou as in die teelklasse. Ons hindernis klas raak 'n groter uitdaging met balle, wipplanke en waiende baniere waardeur die perde moet beweeg het die publiek in ekstase oor die perde se temperament. Ons springklasse is 'n skaretrekker onder die publiek met drie perde wat gereeld oor een meter spring. Ons hoogspring rekord is weer gebreek en staan vanjaar op 1,12m.

All this can only be achieved if we have positive members ..... and so we do!! Thank you for all your contributions one and all. Without you and without your support we are just another breed trying to get somewhere. You people are what is causing us to succeed, thank you for your support and thank you for your enthusiasm. Without you we are nothing!

Ek wens almal 'n Geseënde Kersvakansie saam met vriende en familie. Ontspan baie en rus lekker! Geniet julle perde en veral die nuwe vullens wat gebore word, mag hulle almal beter as hulle ouers wees.

EK BID GOD SE SEËNINGE OORVLOEDIG OOR JULLE ALMAL MET BAIE REËN VIR ALMAL. VOORSPOEDIGE 2016 WORD JULLE TOEGEWENS

I PRAY FOR GOD'S BLESSING ABUNDANTLY OVER EVERY ONE OF YOU WITH AMPLE RAIN FOR ALL. PROSPEROUS 2016 WISHED ON YOU ALL.

## **A HOLISTIC APPROACH TO BREEDING.**

Breeding is multi-faceted. Not one of the facets clearly dominates yet they all depend on each other for the value they ultimately add. Some of the more important facets that ought to be highly ranked in our breeding operations are highlighted here.

**GENETICS** are important because they guide us as to what we can expect. Informed decisions are important and the more we know about the genetics of a horse the more relevant our decisions can be. We are well served to look at the horses ancestors, its siblings and if any of its progeny or the progeny of related horses. We should be guided by the progeny of both the mare and the stallions siblings and ancestors. A horse's pedigree is relevant and it should be accurate. The more generations it covers and information it contains the more information we are able to extract from it.

**NUTRITION** is relevant as no animal will reach its genetic potential without the correct nutrition. A horse with bad genetics or confirmation remains what it is and what it breeds when it is well fed. It just becomes a Fat bad horse. It is easy to overlook bad conformation when the real horse is hidden behind sentiment, fat, colour and condition.

A mare has to grow her foal out and reconceive. The foal has to fulfil its genetic potential and nutrition in a young horse is of paramount importance to unlock the inherent genetic potential a horse has and the breeder might have identified.

**HEALTH** and general condition resulting in generally sound animal husbandry is another important aspect that contributes to the bigger picture. A horse's teeth, feet and coat as well as its general health and parasite load are important aspects that contribute to a successful breeding operation and healthy foals. Managing the finer details of what your horse eats is relevant. Ensuring a balanced age and condition appropriate diet cannot be underestimated. This is a continuous process not an event.

The aspects mentioned here are important but not exclusive of other considerations. There are other aspects not mentioned here that are also relevant and should be considered as part of the bigger picture in **order** to have a holistic approach.

**EYE OF THE BREEDER**, the knowledge he has of his stock and the strategy he employs to reach clearly defined well considered objectives and decisions cannot be underestimated. Passion and enthusiasm and the love we have for our animals are important but it cannot replace realistic expectations and good decisions, focussed attention, and a thorough understanding of basic breeding principles and genetics. These things enhance each other and substituting individual aspects compromise the holistic approach that is so important to the eventual success of most breeding programs.

## THE BURGH SHOW.

A successful show was held at The Burg on the 6<sup>th</sup> November 2015. The Burgh remains a very popular venue where the owners and management take a great deal of trouble to ensure a happy and successful event. This show was attended by 15 breeders who showed 52 horses in 200 classes. The results and photos of this show are available on our Web site. ## PER CAPITA

Die genootskap sukkel nog met die inhaal van agterstallige werk en die administrasie van nuwe versoeke. Ons vra dat lede hulle per capita lyste (kuddelyste) sal trek en ons attent maak op enige foute en/of agterstallige werk wat ingehaal moet word. Maak ook asseblief seker dat alle instruksies wat julle deurstuur vergesel word van die nodige dokumentasie. As julle nie julle Per Capita lyste ontvang het nie, of daar is foute op, trek dit deur Logix of kontak asseblief vir Ronandé Wiese 0514100974 of per epos by [ronande@studbook.co.za](mailto:ronande@studbook.co.za)

## INSPEKSIES.

Inspeksies moet op twee en n half jaar plaasvind en dan weer op vyf jaar. Net 'n lid van die genootskap kan 'n inspeksie aan vra. Dit word gedoen deur vir Ronandé Wiese by die genootskap in Bloemfontein te kontak. Sy sal dan die nodige gekwalifiseerde inspekteurs kontak om die inspeksie te reel. Die inspekteur sal jou kontak om die nodige reelings te tref. Die koste van n eerste inspeksie is R450, inspekteurs fooi is R75 per perd en die inspekteur se reiskostes is R3. 50 per Kilometer.

## DNA

Both paternal and maternal DNA is now a requirement for the registration of a foal. This requirement has been implemented over a period of years starting with the DNA of stallions being a requirement and later introducing the DNA of mares. This gives certainty as to the genetic makeup of a foal and is important in giving buyers of horses the comfort of knowing what they are procuring. More importantly it adds value to our registration papers and ultimately to the value of our horses. If foal records are not accompanied by DNA results from a recognised lab then the registration will become pending and will not be completed till the required results are received. Parental verification is essential and it is advised that this be done the same time as your DNA is submitted. This is done at no extra cost.

There are three laboratories from which the results are recognised.

## **AFRICAN HORSE SICKNESS**

Many of us welcome winter because it reduces the chance of AHS in our horses. The effectiveness of vaccination and what vaccine to use is a debate that rages on. Whether we are required to vaccinate is also debated. Many breeders have difficulty in vaccinating pregnant mares as the vaccine is counter indicated in mares in their first trimester at the time when vaccinations are recommended.

The following has been gazetted.

“ IN ACCORDANCE WITH DEPTH OF AGRICULTURE GOVERNMENT GAZETTE DOC NO. R. 885 & ANIMAL DISEASES ACT 1984 (ACT 35 OF 1984) “ALL EQUINES IN THE REPUBLIC EXCEPT EQUINES IN THE AFRICAN HORSE SICKNESS FREE ZONE AND SURVEILLANCE ZONE, AS DESCRIBED IN ANNEXURE 4, SHALL BETWEEN THE AGES OF 6 AND 9 MONTHS, THEN BETWEEN THE AGES OF 12 AND 15 MONTHS AND THEN AGAIN ONCE EVERY YEAR THEREAFTER BE IMMUNISED WITH AN EFFECTIVE REMEDY BY THE RESPONSIBLE PERSON: PROVIDED THAT THE DIRECTOR IN A PARTICULAR CASE MAY DETERMINE THAT SUCH IMMUNISATION MUST BE CARRIED OUT BY AN OFFICER OR VETERINARIAN”
